Environmental Printing Benefits Statement By using GreenerPrinter.com and New Leaf Paper for this project, we conserved the following resources:

Fully Grown Trees	Gallons of Water	Pounds of Solid Waste	Pounds of Greenhouse Gasses	Miles in a Car
0.23	49.8	10.9	18.4	16.1

300
MILLION
TIRES
SCRAPPED
PER YEAR

YOU ARE HERE

Tire Haulers

Printed on 100% recycled content, 50% post-consumer waste, processed chlorine-free paper.

reCycle.

Where are your tires going?

- Tires are scrapped at a rate of 1.1 tires per person per year
- Leading to over 300 million tires scrapped per year
- Landfill space is already scarce as tires do not biodegrade and have significant negative space
- Tires must either be disposed or recycled
- High disposal costs has created a sector for registered tire haulers to pick up scrap tires
- Tire haulers can either dispose in landfills or bring tires to a recycle facility
- Tire pose many environmental problems:
 - Mosquito infestation
 - Tire fires
 - Take up landfill space

reRubber.

Recycling 100% of your tire

- reRubber charges a disposal fee below the landfill to divert tire haulers and tire dealers from throwing away valuable resources
- reRubber uses the best “green practices” in the industry, utilizing state of the art equipment to drive down the use of electricity, materials and produces zero-waste from our operations
- We are focused on the triple bottom line: **people, planet and profit**
- Recycling Facts in California*:
 - Recycling “waste” has twice the economic impact of landfilling
 - Reduces greenhouse gases equivalent to taking 3.8 million cars off the highways
 - Generates more than \$200 million in sales tax for local jurisdictions for use in health care, social services, transportation improvements and public safety

There are many end products from recycled tires:

- Athletic Surfaces and Playground Cover: provides for the best shock absorption and is much safer than traditional materials
- Rubber Asphalt Concrete: a proven product and is cost-efficient and environmentally friendly alternative to traditional paving
- Safer, longer lasting, better color contrast
- Reduces noise by 85% and better traction
- High quality steel: used in steel mills for all purpose steel
- Fibers: used in construction and carpet
